RadioPro IP Gateway – RTP Updates

RadioPro IP Gateway version 8.1.27 upgrades gateway versions 8.1.x.
This version includes several audio processing improvements including the implementation of additional frame rate settings for RTP streaming.
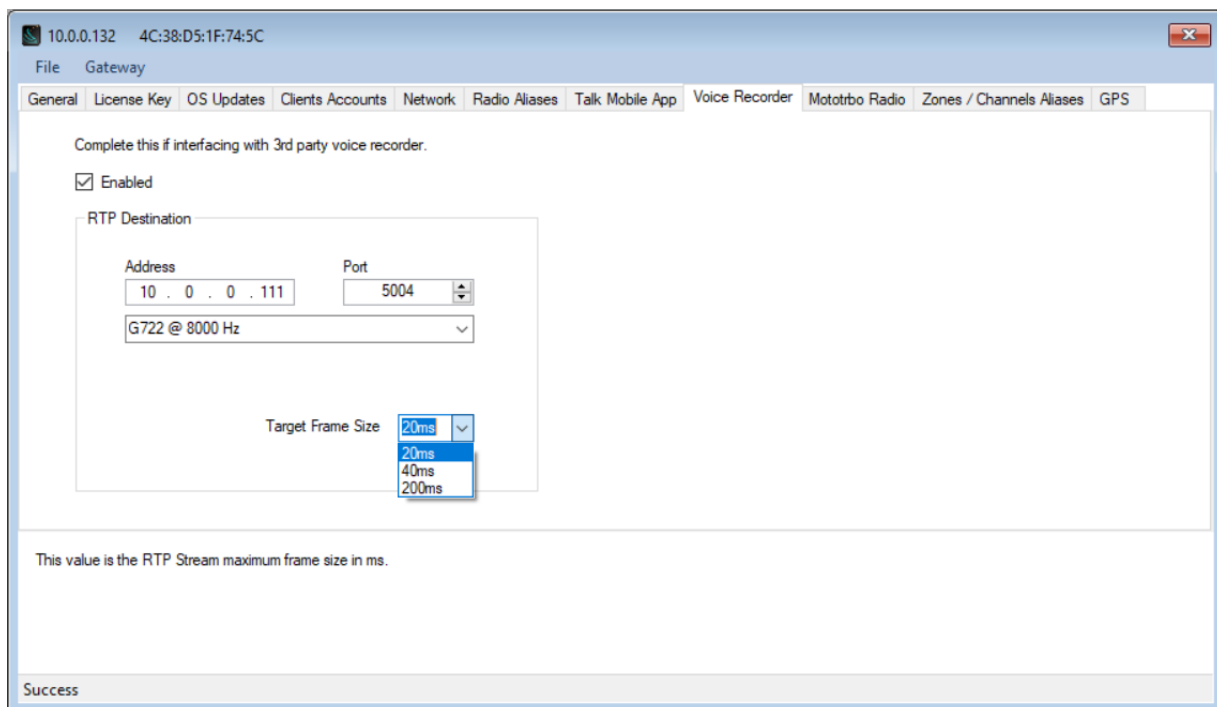

<u>RadioPro IP Gateway 8.1.27</u>   7/02/2024

Release Notes:

```
    * RTP Changes
      - Changed what is transmitted over RTP:
          Intercom: NEVER
          Rx Audio: ALWAYS
          Tx Audio: Only the audio stream from the user that keyed the radio.
      - Mark the first RTP packet of each transmission.
      - Added 20ms, 40ms, and 200ms target frame sizes.
      - Added audio resampling enhancements.
```

<u>ICU 8.3.18</u>   8/06/2024

Release Notes:

```
    * Added RTP Frame Size configuration to the Voice Recorder tab.
```

Target Frame Size:

Sets the target frame size to 20ms, 40ms, or 200ms. (Default 200ms)
