

## Connect a Cell Phone to your Radio System!

The RadioPro Talk™ App remotely connects to **Motorola** MOTOTRBO or **Kenwood** NEXEDGE 2-way radio systems. Android or iOS (iPhone and iPad) mobile devices are supported. The RadioPro Talk™ mobile app is useful over cellular or WiFi networks when you are outside the coverage area of your radio system, yet still need to stay in contact with your team. The RadioPro Talk™ software is the simplest, most reliable, and most cost effective PTT solution for 2-way radio systems on the market.

RadioPro Talk installed on **Android** and **Apple iOS** cell phones

Aina PTT Bluetooth device

The RadioPro Talk™ App includes the following:

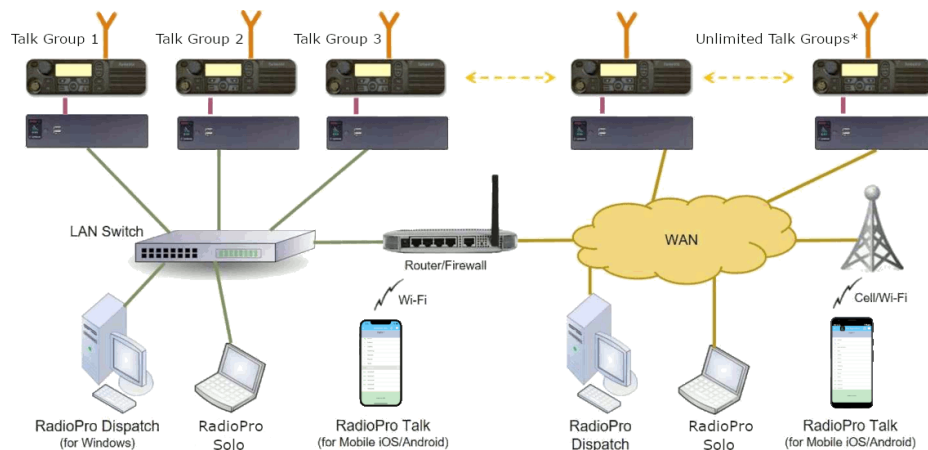

- **Bluetooth PTT Integration:**  
Aina PTT Bluetooth speaker-microphone
- **Text Messaging**
- **GPS mapping**  
Radio subscribers  
Mobile app users
- **Phone-to-phone Private Calling**
- **Background Mode** (*Android Only*)
- **All PC Clients are In the Contact List**  
Mobile app users, Solo Stations, and Dispatchers
- **Zone & Channel Selection**
- **Call Alert and Radio Check**
- **Audio Playback**  
Replay up to 5 previous transmissions
- **Speaker and Microphone Audio**  
Set speaker and microphone audio levels  
Automatic Gain Controls  
Noise reduction (*Android Only*)
- **Private call any PC clients.**  
Cellular, Solo, and Dispatch clients

**Try it!** Download the RadioPro Talk™ mobile app from the Apple App Store or the Google Play Store. Just search for “radiopro talk”. The app is already configured to allow communication on our demo radio system.

# RadioPro Talk™ Mobile Application

## RadioPro™ System

As shown in the diagram below, a RadioPro™ system may have a mixture of client types; Dispatch, Talk, and Mobile. The IP Gateways interface the radio system to an IP network, ensuring easy wide-area deployment without purchasing and configuring server PCs.

\* Max 80 Clients connected to 1 Gateway. Max 70 Gateways connected to 1 Dispatch Client.
